

Our Commitment to the Environment

Avesis is committed to make a conscious effort to be good stewards for the environment. Through the development of our very own Green Program, Avesis is looking to extend our care for the earth to our valued partners - Clients, Brokers and Providers and Members.

As a participant of this program you:

Will work to minimize waste

Promise to use electronic communications whenever possible

Consider our impact on the environment and explore ways to work together effectively without needless depletion of natural resources

Provide feedback and suggestions that will move both organizations closer to being as eco-friendly as possible
